For Immediate Release

The 12V max CXT 3/8" Driver-Drill and 1/4" Hex Screwdriver are more compact for reduced operator fatigue.

## **Makita Introduces 12V max CXT® Cordless Driver-Drill and Screwdriver**

The new driver-drills feature improved, compact designs.

**April 12, 2019, La Mirada, CA** – Makita® U.S.A., Inc., manufacturer of high quality industrial power tools, outdoor power equipment, and accessories, announces the launch of the Makita 12V max CXT® Lithium-Ion Cordless 3/8" Driver-Drill Kit (FD09) and 1/4" Hex Screwdriver Kit (FD10). These tools are an ideal solution for users seeking a more compact driver-drill for applications in tight spaces.

### **Driver Enhancements**

The FD09 and FD10 deliver power and speed in an ultra-compact size for efficient drilling, driving, and fastening. Both tools feature an improved chuck design engineered to reduce run-out, resulting in less wobble on drivers and drill bits. The variable 2-speed covers a wide range of drilling and driving applications. Each product features a built-in L.E.D. light for work area illumination.

### **12V max CXT®**

With Makita 12V max CXT Lithium-Ion slide-style batteries, users get superior balance and ergonomics over pod-style batteries. For longer run time, 12V max CXT cordless tools are also compatible with the 12V max CXT Lithium-Ion 4.0Ah battery (BL1041B, sold separately). 12V max CXT Lithium-Ion batteries are engineered with a Battery Protection Circuit that protects against overloading, over-discharging and over-heating. It's part of the expanding 12V max CXT series, combining performance with superior ergonomics in a compact size.
