FOR IMMEDIATE RELEASE

The new 15° 2-1/2" Siding Coil Nailer (AN613) features an improved design and a built-in air duster to provide convenient air flow to clear work surfaces.

MAKITA INTRODUCES IMPROVED 15° 2-1/2" SIDING COIL NAILER

October 20, 2020, La Mirada, CA – Makita U.S.A., Inc., the innovation leader in power tools and accessories, is proud to announce the release of the new 15° 2-1/2" Siding Coil Nailer (AN613). The AN613 drives 15° wire and plastic collated nails for siding applications. This coil nailer will replace the previous model AN611 with new features and improvements.

The AN613 features an improved ergonomic design. The trigger and head mechanism are designed to reduce air leak and recoil. The nailer weighs only 5.1 lbs. for reduced operator fatigue. A built-in air duster provides convenient air flow to clear work materials and tools. The multi-directional exhaust port rotates 360-degrees to redirect the exhaust air.

Other new features include a tool-less depth adjustment engineered for more precise flush and countersink nailing and reversible belt hook. A two-mode selection switch offers single sequential actuation mode and contact actuation mode.

Makita's purpose-built motor drives a range of 1-1/2" – 2-1/2" nails into fiber cement and wood siding applications. The aluminum housing provides durability to the tool. The clear loading canister with nail size adjustment allows user to quickly view when it is time to reload nails and easily do so.
