FOR IMMEDIATE RELEASE

Two improved 18V X2 (36V) LXT® Brushless Cordless Wet/Dry Dust Extractor/Vacuums offer longer run times and quieter operating sound levels.

## **MAKITA ANNOUNCES TWO NEW AND IMPROVED 18V X2 (36V) LXT® BRUSHLESS WET/DRY DUST EXTRACTOR/VACUUMS**

**January 19, 2021, La Mirada, CA** – Makita U.S.A., Inc., manufacturer of high-quality professional tools and accessories, has released two improved 18V X2 (36V) LXT® Brushless Cordless Wet/Dry Dust Extractor/Vacuums, models XCV20Z and XCV23Z. The new dust extractor/vacuums offer longer run time and lower noise.

Users now get 100 minutes of run time on the normal setting with two LXT 5.0Ah Batteries and a quieter operating sound level of 64 dB(A) on the highest speed.

The XCV20Z and XCV23Z are direct replacements for the XCV06Z and XCV14Z respectively. Similar to the XCV06Z and XCV14Z, the new XCV20Z and XCV23Z offer a variable speed control dial to match the speed to the application, large rubber bumpers to prevent damage to the work environment, an oversized on-off switch for convenience and quick-release metal latches for easy removal and disposal of debris from the canister.

### **18V LXT® System**

Makita® LXT Cordless System, the world's largest cordless tool system powered by 18V lithium-ion slide-style batteries, takes a user from power tools to outdoor power equipment to get the job done. These dust extractors are part of this system, using the same batteries that work in Makita 18V LXT Power Tools. Makita 18V LXT Batteries have the fastest charge times in their categories, so they spend more time working and less time sitting on the charger.

For more information on these products or Makita's wide range of cordless dust extractors/vacuums, please visit [makitatools.com](http://makitatools.com)
