FOR IMMEDIATE RELEASE

*Makita® 21-gauge steel wire is made in the U.S.A. and is the perfect accessory for the Makita® 18V LXT Cordless Rebar Tying Tool (sold separately).*

## **AMERICAN-MADE MAKITA® STEEL TIE WIRE GIVES CONTRACTORS A HOME-GROWN OPTION FOR REBAR TYING**

**Makita® 21-gauge industrial steel tie wire is proudly made in the U.S.A.**

**February 16, 2021, La Mirada, CA** – Makita U.S.A., Inc. is excited to announce a new accessory for fast and efficient rebar tying: 21-gauge steel tie wire made in the U.S.A. The tie wire is made by American workers at the Makita manufacturing facility in Buford, GA.

### **Tie Wire made in the U.S.A.**

For applications requiring American-made industrial products and materials, the 21-gauge steel tie wire offers a welcome solution. The American-made 21-gauge Tie Wire (191L22-4) is constructed with black annealed steel for maximum strength. Each reel provides up to 120 ties for maximum productivity.

The tie wire is ideal for rebar tying with the 18V LXT® Brushless Cordless Rebar Tying Tool (XRT01, sold separately). It is available in a 50-pack for job site use.

### **18V LXT® Brushless Cordless Rebar Tying Tool**

The Makita cordless rebar tying tool takes rebar tying from a two-handed task to single hand operation. It has a tying capacity of up to 5,300 ties of #3 x #3 diameter rebar on a single charge of an 18V LXT 5.0Ah battery, twice the run time of the leading cordless competitor in the category. The XRT01 can tie two #5 diameter bars or four #4 diameter bars in under 1 second. Users can digitally adjust the tying strength to match various tension strength requirements. For fast reel changes, the efficient loading design has an automatic locking mechanism built into the protective cover.

The Rebar Tying Tool also features Fastlane Express Service, a program to expedite service specifically for this tool. Makita will offer a 3-day turnaround on repairs for the XRT01 to all XRT01 owners, in the contiguous 48 states, at no additional cost at Makita's Factory Service Centers. The tool owner will pay for any out-of-warranty repairs. For more information, please call 1(800)4-MAKITA or contact your local Makita® Factory Service Center.

### **World's Largest Cordless Tool System**

The Rebar Tying Tool is part of the LXT System, which offers over 275 cordless solutions powered by the same fast-charging 18V lithium-ion batteries. Makita 18V LXT Batteries have the fastest charge times in their categories, so they spend more time working and less time sitting on the charger.

### **About Makita**

Makita is a worldwide manufacturer of industrial power tools, pneumatics and power equipment, and offers a wide range of industrial accessories. Makita U.S.A., Inc. is located in La Mirada, California, and operates an extensive distribution network throughout the U.S.A.
