FOR IMMEDIATE RELEASE

The 36V Brushless Blower connects to an external backpack power source for improved balance and longer run time.

## MAKITA LAUNCHES CONNECTOR SERIES BLOWER

Connector Series of outdoor power equipment has a connector cable that attaches to an external backpack power source for improved balance and longer run time

**July 20, 2021, La Mirada, CA** – Makita U.S.A., Inc., the leader in cordless power tool innovation, has released the 36V Brushless Blower (CBU01Z), a part of the Connector Series of outdoor power equipment.

### **36V Brushless Blower, Connector Cable, Tool Only (CBU01Z)**

The 36V Brushless Blower provides improved balance and reduced weight. By relocating the battery connection to an external source, the blower weighs less for operator comfort.

The Makita-built brushless motor delivers up to 622 CFM and 157 MPH to move heavy debris. The blower delivers up to 80% more blowing force than a gas blower (when compared to Makita® model BHX2500CA). The cruise control lever with variable speed trigger adjusts between 0 and 530 CFM, allowing the operator to manage power and run time. A speed lock provides continuous operation.

The 3-stage telescoping nozzle features a downward end point to provide more powerful air flow and reduce operator arm fatigue.

The Blower features the exclusive Extreme Protection Technology (XPT™). XPT is a protective seal inside the tool and is engineered for improved operation in harsh conditions by channeling water and dust from key internal components. It also is IPX4 weather-resistant construction for durability and long life.

### **Improved Balance, Less Weight, Longer Run Time**

The Connector Series is a line of outdoor power equipment that utilizes an external battery connection, moving batteries from the unit to a battery backpack (sold separately). A cable connects the unit to the battery backpack. This shift in battery weight from the unit to the backpack provides improved balance and longer run time. Paired with the LXT® and LXT® X2 Portable Backpack Power Supply (PDC01, sold separately), the operator will gain twice the run time for any LXT X2 Product.

With zero emissions, lower noise and considerably less maintenance than gas-powered string trimmers, this blower is a welcome solution for landscapers.

### Specifications

<b>Model</b>	<b>CBU01Z</b>
<b>Description</b>	36V Brushless Blower, Connector Cable, Tool Only
<b>Max. Air Volume</b>	622 CFM
<b>Max. Air Velocity</b>	157 MPH
<b>Sound Pressure</b>	59 dB(A)
<b>Overall Length</b>	38"
<b>Net Weight</b>	5.7 lbs.
<b>Includes</b>	Tool

### About Makita

Makita is a worldwide manufacturer of industrial power tools, outdoor power equipment, pneumatics and janitorial and facility maintenance products and offers a wide range of industrial accessories. Makita U.S.A., Inc. is located in La Mirada, California, and operates an extensive distribution network throughout the U.S.A. With over 50 years in the United States and over 100 years worldwide, Makita utilizes experience and expertise to manufacture best-in-class solutions.
