FOR IMMEDIATE RELEASE

The 18V LXT® Sub-Compact Brushless StarlockMax Multi-Tool provides faster accessory installation to tackle a range of applications.

MAKITA LAUNCHES 18V LXT® SUB-COMPACT BRUSHLESS STARLOCKMAX® MULTI-TOOL

The oscillating tool features a tool-less clamp system for faster accessory installation

September 14, 2021, La Mirada, CA – Makita U.S.A., Inc., the leader in cordless power tool innovation, is excited to release the 18V LXT® Sub-Compact Brushless StarlockMax® Multi-Tool, Tool Only (XMT04ZB). This versatile tool combines performance and speed with low vibration, reduced noise, and the efficiency of the StarlockMax System.

The multi-tool features a brushless motor and variable speed control dial (10,000 – 20,000 OPM) with soft-start so users can match the speed to the application. It has a 3.6-degree oscillation angle for faster, more aggressive cutting and sanding. The small diameter barrel grip provides improved handling and a large on/off slide switch with lock-on button provides convenience.

The XMT04ZB is equipped with Anti-Vibration Technology (AVT®), an internal counterbalance system engineered to reduce vibration. It also features Extreme Protection Technology (XPT™) for improved dust and water resistance for operation in harsh conditions

StarlockMax® System

The StarlockMax System is a tool-less clamp system that allows for faster accessory installation. When used with Starlock Oscillating Multi-Tool Accessories, this oscillating multi-tool is ideal for cutting, sanding, scraping, grout removal, and many more applications.

The XMT04 is compatible with StarlockMax, StarlockPlus®, and Starlock® accessories. To view available accessories, please visit www.makitatools.com/products/accessories/cutting-blades/multi-tool-blades

18V LXT® System

The LXT System, the world's largest cordless tool system powered by 18V lithium-ion slide-style batteries, takes a user from power tools to outdoor power equipment to get the job done. Makita® 18V LXT Batteries have the fastest charge times in their categories, so they spend more time working and less time sitting on the charger.

For improved tool performance and extended battery life, both driver-drills feature Star Protection Computer Controls™. Star Protection is communication technology that allows the Star Protection-equipped tool and battery to exchange data in real time and monitor conditions during use to protect against overloading, over-discharging and overheating.
