The new 40V max XGT® Brushless 1/2" Mixer (GTU01) is for use in both residential and general construction to mix concrete, mortar, and more.

FOR IMMEDIATE RELEASE

MAKITA RELEASES NEW 40V Max XGT® 1/2" MIXER

New cordless mixing tool offers high power for heavy duty operation

September 13, 2023, La Mirada, CA – Makita U.S.A., Inc., manufacturer of high-quality professional tools, power equipment, and accessories, has released the 40V max XGT® Brushless 1/2" Mixer (GTU01) for use in both residential and general construction to mix concrete, mortar, and more.

"With the power capabilities of Makita's 40-volt max XGT® System, the new 1/2" Mixer makes a great addition," said Rudy Jansen, product marketing manager, residential construction, Makita U.S.A., Inc. "With its power capability, ergonomic dual handle design and mechanical 2-speed gearing the GTU01 can accomplish mixing a variety of materials while maintaining comfort and control."

High Power and Heavy Duty

The new 40-volt max XGT® Brushless 1/2" Mixer (GTU01) is a high-power cordless option for heavy-duty operation, such as mixing concrete and mortar. The 1/2" Mixer features a brushless motor and offers variable speed control to match the speed of the tool to the application.

The GTU01 features a variable speed dial that allows the user to adjust the speed from 0-500 RPM in Speed 1 and 0-920 RPM in Speed 2. A soft start suppresses start-up reaction for more control and better accuracy.

Convenience Features

Convenience features include a dual handle design with an ergonomic soft grip for excellent control and comfort. The GTU01 features a protective cover that helps prevent battery contamination from splash back from the mixing compound, and there is also a rubber trigger cover that protects the trigger from mixing compound build up.

For added durability in harsh job site conditions, the Mixer features Extreme Protection Technology (XPT™), which is engineered for improved dust and water resistance. A protective cover helps prevent battery contamination from mixing compound splash back.

XGT®: One System of Cordless Equipment and Tools

The new 40V max XGT® Brushless Cordless 1/2" Mixer is part of Makita XGT®, an expanding system of 40V max and 80V max cordless equipment and tools. XGT® gives users one system, from core handheld

tools like drills and impact drivers to equipment-grade products including high-capacity saws, rotary hammers, and power cutters – all powered by 40V max XGT® batteries. The expanding XGT System will offer 125+ products in 2023.

Specifications

Description	40V max XGT® Brushless Cordless 1/2" Mixer Kit (4.0Ah) (GTU01M1)	40V max XGT® Brushless Cordless 1/2" Mixer (GTU01Z, tool only)
