FOR IMMEDIATE RELEASE

Makita's new 18V LXT
Cordless / Corded Work Light
(DML811) provides direct
flood light on the job site.

Makita Introduces New 18V LXT® Cordless / Corded Work Light

Nov. 1, 2019, La Mirada, CA – Makita U.S.A., Inc., manufacturer of high-quality professional tools and accessories, is introducing a new 18V LXT® Lithium-Ion Cordless/Corded Work Light. The new L.E.D. work light offers battery (sold separately) or corded operation for optimal versatility to get the job done.

With a 6.0Ah 18V LXT Battery, the work light provides up to 13 hours of illumination on low setting and 3 hours on high setting. 3-mode operation delivers 3,000 lumens on high, 1,500 lumens on medium, and 750 on low.

The work light features an efficient L.E.D. light, which effectively illuminates a work area without the high heat of produced from a halogen light. Adjustment knobs enable the user to direct the flood light to the desired angle. Its dust and water-resistant construction (IP65 rated) allows operation in harsh job site conditions.

The work light can be mounted on an optional tripod light stand (GM00002703, sold separately).

18V LXT® System

Makita LXT Cordless System, the world's largest cordless tool system powered by 18V lithium-ion slide-style batteries, takes a user from power tools to outdoor power equipment to get the job done. Makita 18V LXT Batteries have the fastest charge times in their categories, so they spend more time working and less time sitting on the charger.
