FOR IMMEDIATE RELEASE

The new 11 Gallon Wet/Dry HEPA Filter Dust Extractor/Vacuum is powered by a 12 AMP motor that generates 148 CFM of suction power to take on the most challenging applications.

MAKITA LAUNCHES SUPERIOR JOB SITE VACUUM

New 11 Gallon Wet/Dry Dust Extractor/Vacuum offers more power and AWS™ capability

January 15, 2020, La Mirada, CA – Makita U.S.A., Inc., manufacturer of high-quality professional power tools and accessories, has introduced the corded 11 Gallon Wet/Dry HEPA Filter Dust Extractor/Vacuum, AWS™ Capable, (VC4210L) with more power than the previous model, VC4710. The new VC4210 is powered by a 12 AMP motor that generates 148 CFM of suction power and 92" of water lift to take on the most challenging applications.

"Makita made significant improvements with the VC4210L," states Jenny Feng, Senior Product Manager, Jan-San. "The new dust extractor/vacuum offers more power and is an excellent dust-management solution for construction, woodworking, and job site clean-up applications."

Design Features

Design improvements of the VC4210L include:

- **Filtration System** - New 2-stage filtration system that forces particles through a flat filter before entering the HEPA filter. The flat filter offers longer life and increases efficiency of the vacuum. An automatic filter cleaning mechanism removes any buildup from the surface of the filter, also extending the life of the filter and reducing replacement costs. The mechanism uses a reversed-air method, so that every 15 seconds, reversed "clean" air pushes through the filter, removing any build up from the surface of the filter. This system is compliant with OSHA standard for exposure to respirable crystalline silica (rule 1926.1153) and ETL certified to ANSI 1017 standard.
- **Mobile and Stable Design** - The lower center of gravity and wide base prevents the unit from tipping over. Robust wheels offer stability. The back wheels are larger and wider than the VC4710 to maneuver over larger debris on a job site and the front wheels lock to secure the unit in place during operation. A front handle allows for easy tilting of the unit to dispose of liquid.

- **Cord and Hose Organization** – Elastic fasteners firmly hold the cord in place. Side hooks securely hold the hose around the unit when not in use.
- **Interlocking Case Adaptor Plate** - Tools will always be accessible with the Interlocking Case Adaptor Plate. Standard on the VC4210L, the Interlocking Case Adapter Plate secures Makita® Interlocking Case(s), all sizes, to the top of the unit. Makita's Interlocking Cases are sold separately.
- **Auto-Start Wireless System (AWS) Capability** - An on-board tool-activated outlet starts and stops the vacuum/extractor with power tool usage. Auto-Start Wireless System (AWS) utilizes Bluetooth® technology for wireless power-on/off communication between tool and dust extractor. Once connected via AWS, the AWS-equipped dust extractor will automatically power on or off when the AWS-equipped cordless tool starts or stops, running only when the tool is in use. This increases productivity on a single charge and reduces continuous noise at the job or work site. AWS is activated with an AWS Wireless Transmitter (198901-5, sold separately).

The 11 Gallon Wet/Dry HEPA Filter Dust Extractor/Vacuum is engineered to work with Makita's growing system of concrete dust extraction, including grinders and rotary hammers, and woodworking with miter saws, planers, plate joiners, routers, and sanders (attachments and adaptors may be required, refer to each tool's instruction manual).

Specifications

Model	VC4210L
Description	11-Gallon Wet/Dry HEPA Filter Dust Extractor/Vacuum
Gross Container Size	11 gal.
Wet Capacity	9 gal.
Air Flow Rate	148 CFM
Static Water Lift	92"
AMPS	12.0
Working Sound Level	60 dB(A)
Cord Length	24.6 ft.
Net Weight	35 lbs.
Power Type	Corded
Includes	Vacuum, 1-1/4" x 13' Anti-Static Hose, Wet/Dry HEPA Filter, Flat Filter, Disposal Dust Bag, Fleece Filter Bag, Quick-Click Cuff, Hose Cuff Adapter – 15/16", Hose Cuff Adapter – 1-3/4", Quick-Connect Adapter, Hose Hook, Diffuser, Interlocking Case Adaptor Plate
Optional Accessories	Trolley Push Handle, Cleaning Set, Long-life Filter Bag, Motor Filter, Floor Nozzle

About Makita

Makita is a worldwide manufacturer of industrial power tools, pneumatics and power equipment, and offers a wide range of industrial accessories. Makita U.S.A., Inc. is located in La Mirada, California, and operates an extensive distribution network throughout the U.S.A. With 50 years in the United States and over 100 years worldwide, Makita utilizes experience and expertise to manufacture best-in-class solutions.
