FOR IMMEDIATE RELEASE

Makita's new 18V LXT
Cordless / Corded Work Light
(DML809) provides direct
flood light on the job site.

Makita Introduces New 10,000 Lumens 18V X2 LXT® Cordless / Corded Work Light

January 15, 2020, La Mirada, CA – Makita U.S.A., Inc., manufacturer of high-quality professional tools and accessories, has launched a new 18V X2 LXT® Lithium-Ion Cordless/Corded Work Light, Light Only (DML809) that shines bright. The L.E.D. work light offers battery (sold separately) or corded operation for optimal versatility to get the job done.

With a 6.0Ah 18V LXT Battery, the work light provides up to 8.5 hours of illumination on low setting and over 1.5 hours on high setting. 3-mode operation delivers 10,000 lumens on high, 4,000 lumens on medium, and 2,000 on low.

The work light features an efficient L.E.D. light, which effectively illuminates a work area without the high heat of produced from a halogen light. Two batteries can be housed within the work light, but the work light operates using one battery at a time. The second battery is utilized when it is needed, providing extended run time.

Adjustment knobs enable the user to direct the flood light to the desired angle. It is dust and water-resistant construction (IP65 rated) allows operation in harsh job site conditions. The work light can be carried with the convenient handle. The work light can be mounted on an optional tripod light stand (GM00002703, sold separately) individually or with two work lights.

18V LXT® System

Makita® LXT Cordless System, the world's largest cordless tool system powered by 18V lithium-ion slide-style batteries, takes a user from power tools to outdoor power equipment to get the job done. Makita 18V LXT Batteries have the fastest charge times in their categories, so they spend more time working and less time sitting on the charger.
