FOR IMMEDIATE RELEASE

Makita's new 18V LXT®
Cordless/Corded Upright
L.E.D. Flood Light stays
in an upright position.

Makita Launches New 18V LXT® Cordless/Corded L.E.D. Upright Light

New self-righting light is latest addition to expanding range of cordless lighting

June 16, 2020, La Mirada, CA – Makita U.S.A., Inc., manufacturer of high-quality professional tools and accessories, is excited to launch the 18V X2 LXT® Cordless/Corded Upright L.E.D. Area Light (DML810, tool only). This self-righting light stays in an upright position and provides 360 degrees to keep job sites illuminated.

The flood light features a self-righting design that keeps the light in an upright position, even when knocked over, and delivers 5,500 / 3,000 / 1,500 lumens on High / Medium / Low. L.E.D. lights effectively illuminate work area without the high heat of halogens and incandescent lights. This light illuminates 360 degrees for full illumination of the space, or 180 degrees to the left or right.

Get up to 15 hours of continuous illumination with two 5.0Ah 18V LXT Batteries on low (batteries and charger not included) and over 3 hours on high.

Other features include a dust and water-resistant construction (IP54-rated when using battery) for improved operation in harsh job site conditions and AC inlet and outlet for chaining multiple upright lights together. This allows for illumination throughout the job site, from room to room. Convenient carrying handles and a balanced side position allow for easy transportation.

The DML810 offers corded or cordless operation for versatility. It is compatible with Makita's 18V LXT Lithium-Ion Battery System. It holds two 18V LXT Lithium-Ion Batteries but operates using one battery at a time. If operating with a cord and AC power is lost, back-up power is provided by an 18V LXT Battery to keep the flood light on (charged battery must be installed).

18V LXT® System

Makita® LXT Cordless System, the world's largest cordless tool system powered by 18V lithium-ion slide-style batteries, takes a user from power tools to outdoor power equipment to get the job done. Makita 18V LXT Batteries have the fastest charge times in their categories, so they spend more time working and less time sitting on the charger.

Specifications

Model	DML810
Description	18V X2 LXT® Lithium-Ion Cordless/Corded Upright L.E.D. Area Light, Light Only
Battery	18V LXT® Lithium-Ion
Lumens (high/med/low)	5,500 / 3,000 / 1,500
Continuous Use (high/med/low)	3 / 7 / 15 hours
Dimensions	16-1/2" x 16-1/2" x 31"
Net Weight (without Battery)	30.6 lbs. (battery sold separately)
Includes	Light, AC Adapter
