FOR IMMEDIATE RELEASE

Makita has recently released the 5" Paddle Switch Angle Grinder with AC/DC Switch (9558HP) adding another option for professional users in metal fabrication shops as well as the electrical, mechanical, and plumbing trades.

MAKITA EXPANDS LINUP OF GRINDER OPTIONS WITH NEW 5" PADDLE SWITCH ANGLE GRINDER WITH AC/DC SWITCH

New angle grinder offers high power with low weight and multiple power options

February 14th, 2024, La Mirada, CA – Makita U.S.A., Inc., manufacturer of high-quality professional tools, power equipment, and accessories, has released the 5" Paddle Switch Angle Grinder with AC/DC Switch (9558HP) adding another option for professional users in metal fabrication shops as well as the electrical, mechanical, and plumbing trades.

"Makita goes deep and wide in the grinding category, offering users a solution to fit their needs. The new 5" Paddle Switch Angle Grinder, with AC/DC Switch (9558HP) further expands Makita's current grinding portfolio," Said Rufus Richardson, senior product manager for commercial products, Makita U.S.A., Inc. "The 5" Paddle Switch Angle Grinder gives the user 7.5 AMPs plus 10,000 RMP in a 4.5 lb grinder."

High Power, Compact Size

The 9558HP features a powerful 7.5 AMP motor that delivers 10,000 RPM for faster material removal. The large, large flush-mounted paddle switch offers greater user comfort. The 5" Angle Grinder features a compact design at only 2-1/2" diameter barrel grip for added user convenience.

Wide Variety of Users

A long list of features and great power-to-weight ratio makes the 9558HP idea for users in the electrical, mechanical, and plumbing trades. It is also ideal for users in fabrication shops allowing users to perform a wide variety of metal grinding applications.

Power Options

Users on job sites face a variety of challenges when locating a power source and the 9558HP allows users more options. The user has the option of using a simple slide switch to allow the 5" Angle Grinder to operate off of either AC or DC power (with a generator), depending on which power source is available at a job site.

Rugged Construction for Pro Users

The 9558HP features labyrinth construction, which seals and protects the drive gear and bearing from contamination, as well as zig-zag varnish on both sides of the armature coil and a powder-coated field for added protection from dust and debris for longer tool life.

Additional Features

Additional features include an all ball-bearing design and metal gear housing for durability, and thicker coil wires that are wound more closely to reduce heat and energy loss. There is also a push button spindle lock and a side handle for operator convenience. The 9558HP weighs only 4.6 lbs for added user comfort.
